Dura Max presents the Dura Poly Lights and Lamp Poles for Brightening your paths. Lighting the outside of your property is an opportunity to express your creativity. The outdoor lighting range will keep the exterior of your house well-lit!

The street lighting architecture is an essential part of an environment's aesthetics. Creating an effective streetscape involves selecting products that not only blend with the architecture, but also suit their surroundings. Effective outdoor lighting needs designs that are not just an optimum mix of performance and aesthetics, but also sensitive to the growing environmental and energy demands. As part of such an environment, the luminaires' appeal in the daytime is just as important as their performance at night. Wider roads like highways, main and auxiliary roads require poles and fixtures with considerable mounting heights. On the other hand, historic areas, gardens, city centres and pathways use more pedestrian-scale products to create an inviting environment. Incorporating ornamental luminaires into a streetscape can create an ambiance that pairs well with the appeal of the surrounding structures.

What we offer

Dura Max Poly lights products combine design with performance to give a signature daytime appearance while providing effective nighttime illumination. We offer lighting inspired by various eras as a design element in public spaces, while providing the illumination needed to create a safe and secure environment after dusk. Our luminaire range gives clients the option to replicate almost any historic period to complement the site architecture. Dura Max offers a wide variety of decorative poles, available in various heights to match the scale of the surroundings and adapt to specific needs. A suitable combination of our luminaires and poles promotes uniformity and visual comfort while minimising light wastage, and comes with ease of installation and maintenance.

APPLICATIONS

- Area Lighting
 - Parks and Garden lighting
 - Architectural spaces
 - Malls, institutional campuses etc
- Jogging tracks/Parking spaces
