# ROAD BARRIERS

## ROAD BARRIER WE ARE THE FIRST

# 1

Keep Yourself Healthy ©  
**DURA** MAX

Dura Max offers excellent Road Safety Barriers in Pakistan. Dura has 35 years of experience in providing quality plastic products in Pakistan including Road barriers, Plastic Barriers, Water-filled road barriers, road separators, road jersey barriers, and security barriers.

Efficient road barriers and a controlling system have become the need of the hour these days. Also, with an increasing number of vehicles in populated areas such as offices, hospitals, public places, and residential premises. Moreover, Dura Road security barrier solutions are developed to ease parking issues, control speed, divert traffic, management of the lane, highlight construction zones, and work as lane/road dividers

### **Safety Benefits of using Road Divider**

An increase in the number of vehicles has led to subsequent risk of road hazards in the form of accidents. Road traffic deaths have increased over the years. It is crucial to manage traffic efficiently to avoid deaths or injuries caused to due road accidents.

Road dividers are used to separate the direction of traffic, manage lanes, control the speed of traffic, and alert motorists of any nearby construction site.

Road Barriers also protect from traffic congestion in case of an accident on either side of the road.

Dynamically designed by experts in road safety standards, road dividers manufactured by the special group are amongst the best products in the country. Dura Road dividers are strong, durable, impact-resistant, and affordable.

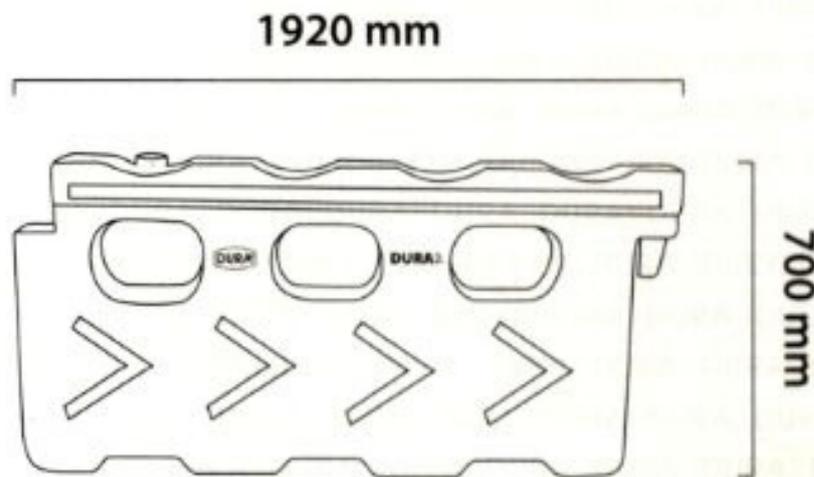

# Features Dura Road Barriers

- Dura Road Safety Barriers are Lightweight & Easy to Transportation
- Road Barriers are easy to lay and in Installation
- They are flexible and at the same time good impact strength
- UV radiation resistant & Weather resistant
- Excellent chemical resistant
- Resistant to the growth of bacteria, algae & fungi & Freeze resistant
- Dura Road Barriers have good weldability & No maintenance
- Dura has a low coefficient of friction & Nontoxic and nonconductive
- Odorless & tasteless & Absolutely leak-proof

# Why Dura Road Barriers

DURA MAX Barriers	CONCRETE BARRIER
DM Barriers is designed to stop vehicle or slide it down the barrier, absorbing energy and saving lives.	The concrete barrier is designed in such a way as to ramp a vehicle back into the lane it come from. In most cases this causes the operator to lose control.
DM Barriers will remain intact with no breakage, crumbling or tearing apart. The U.V. protection prevents crumbling.	When incurring a severe impact, the concrete barrier will break. Gradually the concrete will begin to crumble.
DM Barriers can be easily moved and placed by two labours or a skid steer.	Moving and placing the concrete barrier requires a crane or other heavy equipment.
DM Barriers can be transported with a pickup or a trailer.	A tractor trailer is required to transport 9 -12 units.
DM Barriers can be ordered in your choice of colors.	Concrete Barriers are gray, or require regular painting.
